OPTIONAL FEATURES

In.Touch® Phone App

Control your spa experience anytime, anywhere with the In.Touch® app for iOS and Android smartphones and tablets. Instantly access preset spa settings or create your own customized experience for the perfect soak every time. With just a few taps, you can manage your spa's features effortlessly, making comfort, convenience, and relaxation easier than ever.

In.Stream® Audio System

The In.Stream® audio station is a compact, durable, and splash-resistant outdoor audio system that uses Class D amplifier technology to deliver rich sound. Designed to elevate your backyard experience, it connects easily to your audio player or smartphone and lets you control your music directly from the spa keypad, so you can relax, unwind.

Circulation Pump

A circulation pump keeps the water continuously moving, helping prevent stagnation and bacterial buildup while reducing wear on the spa's main pump. It's a must-have feature for keeping your spa clean, healthy, and ready to enjoy every time. The circulation pump provides more longevity to your spa life for your relaxation and enjoy for years to come.
